

# D3js v4 - Graph Visualization

---

## Project 2 by Abrar Jahin

All work tasklist can be found in [here](#) and code can be found in [here](#).

The adjacency matrix is looking like this-

	1	2	3	4	5	6	7	8	9	10
1	0	0	1	0	0	1	1	0	0	0
2	0	0	1	0	0	1	0	1	1	0
3	1	1	0	0	0	0	0	0	0	1
4	0	0	0	0	1	0	1	0	1	0
5	0	0	0	1	0	0	0	1	0	0
6	1	1	0	0	0	0	0	0	1	1
7	1	0	0	1	0	0	0	1	0	0
8	0	1	0	0	1	0	1	0	0	0
9	0	1	0	1	0	1	0	0	0	0
10	0	0	1	0	0	1	0	0	0	0

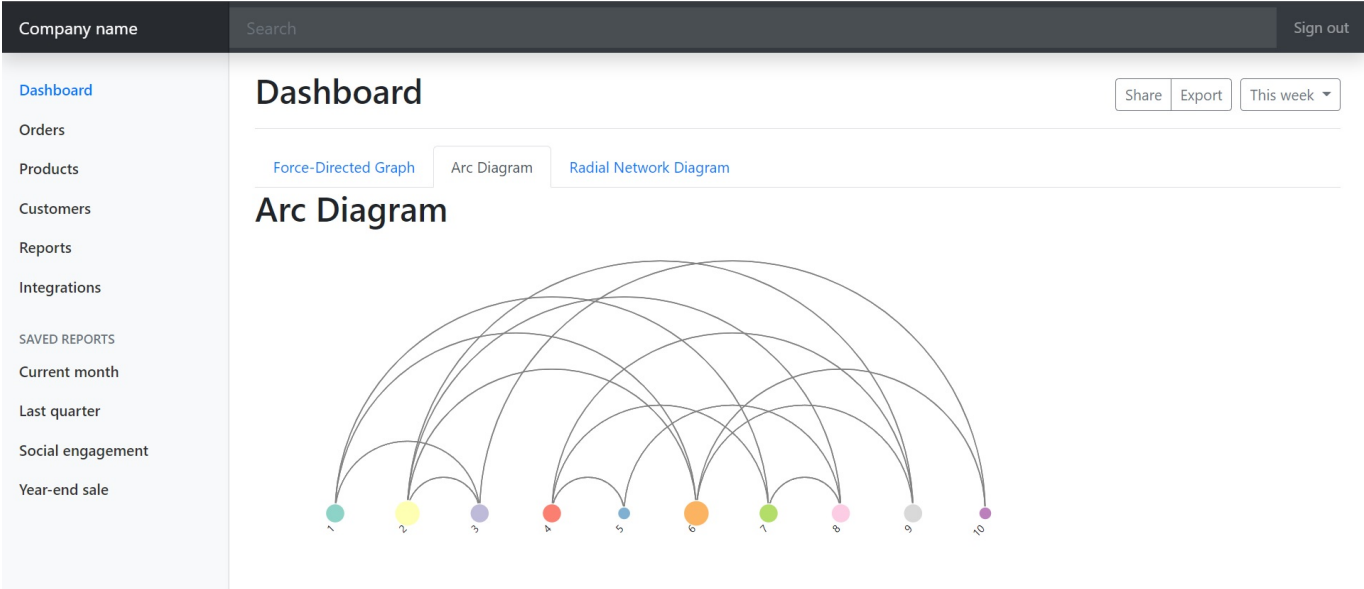

## Manual Drawing

Hand drawn graph from the adjacency matrix is like this-

The dashboard is looking like this-

Dasbboard

where different components can be switched from tab and every component is interactable. The 3 components are-

1. Force Directed Graph

I am doing it as a directed graph with a direction from source to destination.

And the graph is self adjustable and interactable. The node names are also hoverable like this-

Force-Directed Graph

Arc Diagram

Radial Network Diagram

# Force-Directed Graph

## 2. Arc Diagram Graph

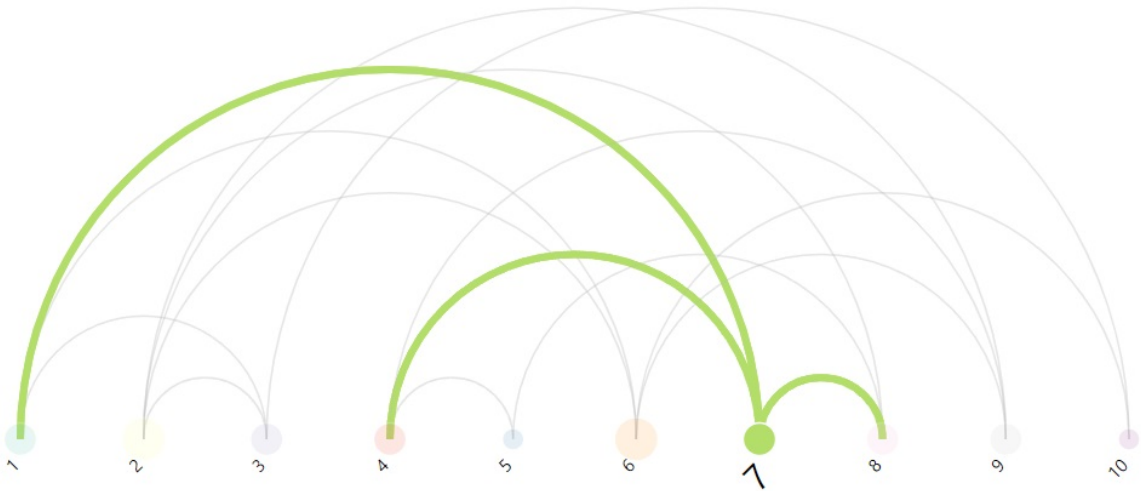

The arcs are hoverable and interactable like this-

[Force-Directed Graph](#)

Arc Diagram

[Radial Network Diagram](#)

# Arc Diagram

3. Radial Network Diagram Gaph

And after hovering any item, the graph is looking like this-

[Force-Directed Graph](#)[Arc Diagram](#)[Radial Network Diagram](#)

# Radial Network Diagram
